ExpeditorSUBJECT: Second Annual Report on Progress of Work Simplification Program.

TO: Commanding Generals and Commanding Officers  
All ASF and QM Depots.

1. Attached hereto is copy of the second annual report on progress of the Work Simplification Program as relates to Quartermaster Depots and Quartermaster Sections of Army Service Forces Depots under the jurisdiction of The Quartermaster General.

2. The figures on accomplishments indicate the effective use that Depot Commanders through their Control Staffs have made of the Work Simplification Program to increase efficiency of operations and savings in personnel, material, equipment and time. In general, the results are gratifying.

3. Since the inception of the Program, approximately 90,500 people have been surveyed with a savings of over 23,000 of those surveyed. The results herein reported are for the calendar year 1944 and the first quarter of 1945. During the period January 1944 to April 1945, surveys were completed on 34,792 or 59.8% of personnel as of 1/1/44 in Quartermaster Depots and Quartermaster Sections of Army Service Forces Depots. Of the number surveyed, 7,697 or 22.1% were saved.

4. The following sections set forth in detail the accomplishments of the Depots:

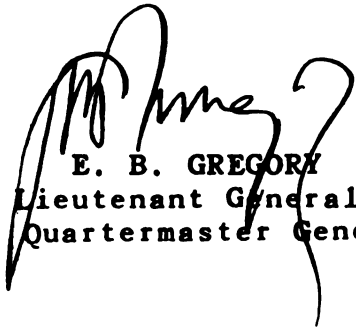

I. Summary of accomplishments.

II. Accomplishments of individual depots.

5. In reviewing Section II, it will be noted that no attempt was made to establish comparisons between the performance of individual depots. It is well known that there are certain conditions which make it difficult or impracticable to establish outright comparisons. The outstanding results accomplished by many depots during the first year of the program would tend to lessen the opportunity for savings during the past year. This factor should be taken into consideration in measuring results, as well as the variations in the missions of the depots and their personnel problems. Nevertheless, each depot will have a basis on which conscientiously to judge its own performance and take remedial action if necessary.

6. Although much has been accomplished to date, the urgency of the man power shortage requires that we do more work in less time, with less effort and less man power through the use of better methods. The proven means of accomplishment is the Work Simplification Program. Therefore, your continued backing of this Program is urged.

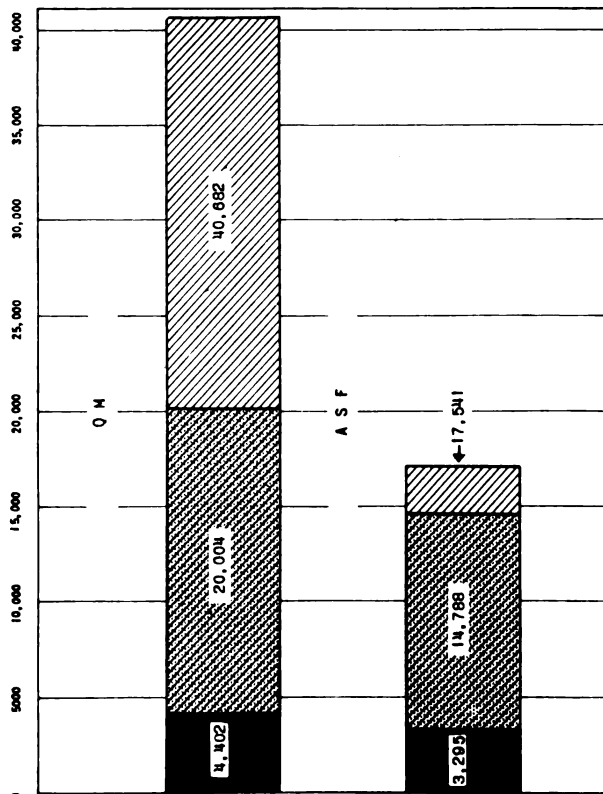

E. B. GREGORY  
Lieutenant General,  
The Quartermaster General.
